Restore your floor, upgrade your home

(NewsUSA) - Nothing refreshes a home like new, high-quality flooring. The right flooring can help add style and warmth to a kitchen, infuse energy into a workout room, and lend an air of professionalism to an office.

Now is the perfect time to enhance your space with new flooring as you welcome more guests to your home. Some popular types to consider for your floor installation or replacement include laminate and vinyl. Both are attractive, cost-effective, and easy to install. Here's a quick rundown to help you decide which is best for you:

- Laminate: Several key features make laminate flooring stand out from other types.

Laminate flooring is made by taking an ultra-high-definition image of the mate-

rial, whether it is wood, tile, or stone, and printing that image within the plastic material of the flooring.

"Laminate flooring used to have a reputation for being slippery; however, modern manufacturing methods have enabled designers to use slip-resistant material and increase the texture gravure depth allowing for better traction," according to HomeSolutionz, a licensed, bonded, and insured flooring company based in Phoenix.

Laminate flooring can be used in any area of a home, including kitchens, bathrooms, hallways, living rooms, and even home workout rooms or art studios.

"Using Click and Lock Technology at the seams, new laminate flooring is designed to be easy to install,"

according to Home Solutionz experts.

- Vinyl: Luxury vinyl plank is an elegant and popular flooring choice that has the added benefit of being easy to clean and care for, a bonus for busy homes. A skilled contractor will ensure that the vinyl plank floor in a home lasts as long as it should.

High-traffic areas may require more frequent replacement but a reliable flooring company can install a luxury vinyl plank floor with seamless spot treatments or more complete replacements when needed to keep your home looking fresh and appealing.
